

Website Cookie Policy

To make this site work properly, we sometimes place small data files called cookies on your device. Most websites do this too.

What are cookies?

A cookie is a small text file that a website saves on your computer or mobile device when you visit the site. It enables the website to remember your actions and preferences (such as login, language, font size and other display preferences) over a period of time, so you don't have to keep re-entering them whenever you come back to the site or browse from one page to another.

How do we use cookies?

A number of our pages use cookies to remember:

- your display preferences, such as contrast colour settings or font size
- if you have agreed (or not) to our use of cookies on this site

Also, some videos embedded in our pages may use a cookie to anonymously gather statistics on how you got there and what videos you visited.

Enabling these cookies is not strictly necessary for the website to work but it will provide you with a better browsing experience. You can delete or block these cookies, but if you do, some features of this site may not work as intended.

The cookie-related information is not used to identify you personally and the pattern data is fully under our control. These cookies are not used for any purpose other than those described here.

These cookies are not integral to the services provided by the website to you and may be blocked at your choosing via your internet browser's privacy settings. Please ensure that your internet browser is up-to-date and consult the help and guidance provided by the developer of your browser if you are unsure as to how to adjust your privacy settings.

How to control cookies

You can control and/or delete cookies as you wish – for details, see [aboutcookies.org](https://www.aboutcookies.org) or consult the help menu in your browser. You can delete all cookies that are already on your computer and you can set most browsers to prevent them from being replaced. If you do this, however, you may have to manually adjust some preferences every time you visit a site and some services and functionalities may not work.
